## OBJECTIVE

Courteous and enthusiastic, I am interested in IT and everything in its orbit. I recently began to be fascinated by web programming, e.g. developing apps and building websites. As this area complements my studies, I am keen to gain more experience in the field. For this reason, I am looking for a company willing to offer me a placement among their developers. In return, I would offer my full commitment, and be a pleasant and friendly addition to your team. I'm therefore currently looking for a job or an internship.

## EDUCATION

### Master of Computer Application

NOV 2021-JUL 2023

- Pimpri Chinchwad College of Engineering, Pune | CGPA: 7.32

### Bachelor of Computer Application

## PROJECTS

### Doktalk- BCA Final Project - [Link](#)

March 2021

Online doctor consultation website built using MySQL, Php and Bootstrap and JavaScript.

- Designed and implemented a comprehensive appointment management system, enabling users to register and book appointments with registered doctors, and receive timely confirmations and prescription details.
- Ensured the security of user data through a robust authentication system, coupled with a responsive design for universal accessibility, creating a trustworthy and user-friendly environment.

### E-Commerce Webapp - MCA Final Project - [Link](#)

April 2023

E-commerce app built using MySQL, Php and Bootstrap and JavaScript.

- Developed a dynamic e-commerce web application using HTML, CSS, JavaScript, and PHP, showcasing proficiency in traditional full-stack web development technologies.
- Employed PHP's dynamic features for user authentication, product catalog browsing, shopping cart management, and secure payment processing, ensuring a smooth and secure online shopping experience for users on various devices.

## CERTIFICATES

### Developing Front-End Apps with React (Extra Credit Coursera) - [Link](#)

April 2023

- Successfully completed a course in developing interactive user interfaces and web applications using React, JSX, and ES6, building dynamic websites with reusable components, and effectively communicating with external services via GET, POST, UPDATE, and DELETE requests, while employing React concepts such as props, states, hooks, forms, and Redux.
